Alertus Technologies Summer 2018 Release Now Available
-- Software update and new features available for download July 31, 2018 --

Beltsville, MD (July 31, 2018) – Alertus Technologies, the leader in emergency mass notification solutions, today announced the Alertus Summer 2018 Software Release is not available. The Summer 2018 Release focuses on enhancing the customer experience and delivers new features to the Alertus Console, Mobile App, and offers Everbridge users an even more seamless experience when using Incidents for sending alerts.

"The Summer 2018 Release is highly driven by customer input and feature requests," said Ryan Ockuly, National Sales Director and VP of Product for Alertus Technologies. "That means more advancements within our mobile apps, integrations, and ease of use."

Other new features and enhancements from the Alertus Summer 2018 Release include:

- Alertus Mobile Audio Tones: Plays a unique audio tone when the Alertus Mobile App receives an alert
- Alertus Mobile Event Details: Allows full details to be displayed in the Alertus Mobile App when an event (e.g., Panic Button Activation, Weather alert) occurs
- Everbridge Webhook Integration: Designed for customers who utilize Incidents when sending alerts from Everbridge, this option can allow activators to specify dynamic activation parameters (e.g., groups, duration, preset alerts) when the incident is initiated
- SwiftReach Integration: Outbound integration to activate Swift911 from Alertus
- UI Improvements: Improved appearance of alert and confirmation dialogs, displays currently logged In User count (for admins), improved system error reporting, improved layout of Alertus middleware settings page

Alertus Mobile App users will need to download the latest update from the iOS App Store or Google Play store. Alertus customers can access and view all update features by logging into their customer portal at my.alertus.com. For more information on Alertus Technologies, please visit www.alertus.com.
