Network Security Appliance
Secures any site up to 32 cameras

Designed to secure any site requiring up to 32 cameras, or up to 100 readers, the SV-32 supports a wide range of IP cameras and provides native integration with a variety of IP-ready door controllers and electronic locks from Genetec's growing ecosystem of access control technology partners. When deployed as a unified system, the SV-32 provides a consolidated view and control of video and access control activities with powerful monitoring, alarm management, and reporting tools. *Genetec.*

High Power Speaker
Text-to-speech technology

Alertus Technologies, LLC offers text-to-speech (TTS) technology embedded in a high power speaker array (HPSA). Dynamic TTS technology provides clearly annunciated emergency notifications that can easily be heard over siren systems. Software is certified to be behind Department of Defense firewalls, making this system one of the safest and most secure options available. *Alertus Technologies.*
