Beltsville, MD – March 06, 2020 – Alertus Technologies, a market leader in mass notification enterprise solutions, is pleased to announce that it has received its Underwriters Laboratories (UL) 2572 certification.

The UL 2572 certification was specifically developed in 2011 to evaluate the performance of a Mass Notification System (MNS). To qualify for a UL 2572 certification, the MNS is required to pass a series of rigorous tests based on UL’s industry standards for electronic devices and components. In particular, the MNS should be able to function successfully within 10 seconds after being deployed for an emergency situation.

Alertus is the first unified mass notification provider to become UL 2572 certified for its Alertus Emergency Mass Notification System, a facility-based, mass notification and communications solution that allows organizations to send critical information to all integrated alerting endpoints.

“This is a major milestone for our organization and the industry,” said Jason Volk, CEO and Founder of Alertus. “Being the first enterprise class system to meet UL’s new mass notification performance and reliability standards is a testament to the work and dedication of our engineers to create and continually advance exceptional life-saving alert notification solutions.”

Abed Yassine, Engineering Product Manager in Hardware for Alertus, added, “Alertus is the trusted emergency notification solution for more than 2,000 global enterprise institutions—both large and small. This UL 2572 achievement further speaks to the reliability and performance of the Alertus System.”

To learn about Alertus’ industry-leading emergency mass notification solutions and offerings, be sure to stop by booth #501 during the upcoming DRJ Spring 2020 Conference in Orlando, Florida, from March 16, 2020 - March 18, 2020.

###

About Alertus Technologies

Alertus Technologies is a pioneer and market leader of emergency mass notification systems for large-area, high occupancy facilities. Since 2002, Alertus has engineered groundbreaking solutions for unified mass notification, in-building notification, outdoor notification, and personal notification. Alertus solutions have been implemented worldwide by thousands of organizations in multiple industries for any number of emergency situations.
